Work will conclude tomorrow on Studies and Soil Characterization Tekakwitha Island Bridge

(Kahnawake – 22, Ohiarí:ha/June 2022)

The Mohawk Council of Kahnawà:ke would like to advise the community of an ongoing study conducted by the St. Lawrence Seaway Management Corporation for the Tekakwitha Island Bridge will conclude **TOMORROW** (Thursday). The studies are being carried out by the engineering firm SNC-Lavalin between **7am and 6pm**.

The work involves drilling into the rock at the four (4) corners of the existing bridge. The data gathered will be used to assist in the planning, design, and feasibility for the construction of a pedestrian and cycling bridge to the Island.

Due to the nature of the work, one (1) lane will be closed over the bridge. Proper signage will be installed, and flagmen will be on site to ensure safety and the flow of traffic.
