

IS YOUR FAMILY PREPARED FOR WILDFIRES

Warmer weather has finally arrived and everyone is cleaning their property.

Please remember that burning the grass in your yard won't help it grow back faster, thicker or greener. Plus, it's against the law.

What's worse, the wind may push the fire into nearby dry brush, causing an even bigger wildfire and ultimately engulfing a nearby home, maybe yours!

If outdoors, never leave a campfire unattended and make sure to completely extinguish the fire when leaving.

Let's enjoy the renewal that Spring brings.

Remember.. only you can prevent Wild Fires!
