We can't seem to do anything about the traffic, but can we at least make it safer? Widen the road, cover the huge ditches on both sides, include a bicycle path.. it's such a dangerous road and only a matter of time before someone else is hurt or killed. | 11 | its not just the new cultural center/museum that needs funding and support, its the cultural center itself so they can continue offering their adult language program and all of their services and other language and culture programs. put the MCK one under them and give them the funding for that too. Community members should get some input on where MCK's funds are being spent, since they're public funds. Also pay your employees better. other orgs are getting ahead of MCK in this area and paying more for similar positions. We need to make sure the laws that are created are actually enforceable. why make laws if they aren't being used properly? Get water down the 207 and OCR! the 207 was supposed to be done before the Jason Diabo lawsuit debacle, why isn't that back on track? don't spend money on infrastructure to develop for businesses; residents should come first. Get the KGC back on track/make them hold elections. and get the cannabis industry up and running. its been years since legalization and Kahnawake still hasn't done anything significant. missing the boat on this industry. | 9/19/2024 3:30 PM |
