## Important Information on Home Heating and Energy Upgrade Programs

(Kahnawake – 6, Enniska/February 2026)

The Mohawk Council of Kahnawà:ke wishes to advise community members that several provincial and utility-based programs are available to help homeowners upgrade heating systems and other energy-efficient equipment, including heat pumps. Program deadlines and requirements vary, and members are encouraged to review details carefully before starting any work.

**Chauffez vert (Government of Québec)** is a provincial program that provides financial assistance to homeowners replacing oil or propane heating systems with electric or renewable energy alternatives. This program is scheduled to end on **March 31, 2026**. To be eligible, all work must be completed and the application submitted before this date. More information is available at:

<https://www.quebec.ca/en/housing-territory/heating-energy-consumption/financial-assistance-retrofits/chauffez-vert-oil-propane>

Other provincial programs, such as **Éconologis**, **Rénoclimat**, and **Novoclimat**, may also be available. These programs are not managed by Hydro-Québec and each has its own eligibility criteria and timelines. Information can be found at the same Québec government link above.

The **LogisVert Program**, administered by Hydro-Québec, offers financial assistance for various energy-efficient measures, including heat pumps. Applications can be submitted online or by phone at **1-833-396-1888**, Monday to Friday, 8am to 8pm.

Applicants should be prepared to provide installation details, their Hydro-Québec customer number, address, and supporting documents such as invoices, proof of property, and a photo of the new installation. More information about LogisVert, including the heat pump program, is available at: <https://www.hydroquebec.com/residential/energy-wise/financial-assistance/logisvert/residential.html>

The Mohawk Council of Kahnawà:ke encourages community members considering home energy upgrades to plan ahead, particularly for programs with firm end dates, and to contact program administrators directly for the most up-to-date information.
